PROFESSIONAL SUMMARY

Computer Science developer with hands-on experience building production software, full-stack web applications, AI-integrated prototypes, game prototypes, and visual content. Skilled in full-stack development, AI/LLM integration, backend APIs, database architecture, UI implementation, Unreal Engine prototyping, and video post-production.

TECHNICAL SKILLS

Languages & Web: TypeScript, JavaScript, Python, C#, Java, HTML/CSS

Frameworks & Data: React, Node.js, .NET, PostgreSQL, Tailwind CSS

AI & Engineering: LLM API Integration, Prompt Engineering, AI-Assisted Development, Agentic Workflows, Local LLM Tooling

Creative & Game: Unreal Engine, After Effects, Sony Vegas, CapCut, Canva

Core Competencies: Full-Stack Development, Frontend Development, Backend APIs, Database Architecture, UI Implementation, Game Prototyping, Video Editing, Motion Graphics

EXPERIENCE

Video Editing & VFX | 2022 - Present

- Produce visual and cinematic content using After Effects, Unreal Engine, and Sony Vegas.

SELECTED PROJECTS

FrogPOS | Multi-Tenant Point-of-Sale Platform

- Designed, developed, and deployed a multi-tenant point-of-sale platform for Filipino businesses.
- Built workflows for offline-aware sales, ordering, inventory, kitchen operations, billing, and localization.

Prepaview | Gamified Interview Simulation

- Built an Unreal Engine interview simulation prototype using gameplay systems, Blueprints, C++ integrations, and AI behavior.

Restaurant Bot | Conversational Ordering Prototype

- Developed an accessible framework-free conversational ordering prototype using deterministic states and safe output rendering.

PROFESSIONAL AFFILIATIONS

DevCon Philippines | Developer Community Member | 2025 - Present

- Participate in the Philippine developer community and collaborative technology activities.

EDUCATION

Bachelor of Science in Computer Science | 2022 - 2026

Relevant Coursework: Algorithms, Databases, Full-Stack Development, Software Engineering, Game Development
